Le trasformazioni in atto nei modelli sociali, economici e di business sollecitano la sperimentazione di nuove metodologie e strumenti anche allo human resource management. La frammentazione di interessi, aspettative e identità, insieme alla contestuale pluralizzazione dei significati del lavoro e del successo, richiedono infatti a imprese e organizzazioni apertura, pluralismo e capacità di includere la diversità. È una sfida importante per la funzione e i professionisti HR, impegnati nel ridisegnare sistemi, processi e strumenti di valorizzazione delle risorse umane come fossero architetti di imprese e organizzazioni che diventano development factory, luoghi e laboratori per innovare e creare valore con le persone. In questa prospettiva il volume propone, attraverso il metodo dei case study, una riflessione sull’evoluzione dei principali strumenti di valutazione, sviluppo e valorizzazione delle risorse umane. Il libro raccoglie, infatti, le esperienze di 7 aziende di grande rilevanza nel panorama internazionale – Brembo, Finmeccanica, Ibm, Ikea, Novo Nordisk, RCS, Unicredit – e testimonia come modelli e strumenti di human resource management possano trovare concreta e innovativa applicazione nei diversi contesti culturali ed industriali. Il volume – anche grazie alle teaching notes rese disponibili dagli autori – si propone come un valido supporto per quanti, in contesti di apprendimento sia universitari che professionali, vogliono stimolare il
confronto su pratiche HR di eccellenza, riflettendo sulle loro modalità di implementazione e sulle implicazioni strategiche per l’organizzazione.
